PROFESSIONAL SUMMARY

Frontend Engineer (5+ years) specializing in scalable, high-performance React applications and modern UI architectures. Experienced in system design, performance optimization, and leading cross-functional teams, with a focus on AI-assisted development and automation to enhance productivity and delivery speed.

PROFESSIONAL EXPERIENCE

Frontend SME (Subject Matter Expert)

Mavlers

Feb 2025 – May 2026

Remote

- Introduced AI-assisted development workflows and automated documentation & test generation, significantly improving development speed, reducing repetitive effort, and accelerating onboarding.
- Leveraged AI-powered debugging, code analysis, and internal workflow templates to improve issue resolution time, code stability, and standardize modern frontend development practices.
- Build high-quality, scalable frontend applications using React, Redux, JavaScript, Jest, Webpack, HTML, CSS, and GSAP.
- Develop custom React components for Webflow, extending platform capabilities for enterprise use cases.
- Optimize performance with lazy loading, code-splitting, memoization, and accessibility best practices.
- Lead and mentor a cross-functional team of 8+ Developers & QA, ensuring code quality and smooth delivery.
- Collaborate across design, backend, and QA to deliver robust, production-ready features.
- Manage client communication end-to-end, presales, requirement analysis, estimations, and project delivery.
- Automated marketing workflows (HubSpot/Marketo/Pardot) and connected frontend with CRM data pipelines.
- Contribute to internal component libraries, coding standards, and engineering best practices.

Senior Frontend Associate

Siam Computing

Feb 2023 – Nov, 2024

Chennai, Tamil Nadu, India

- Led frontend and backend development of 5+ web applications using React and Node.js
- Integrated RESTful APIs with frontend, ensuring smooth and efficient data flow.
- Improved page load times by 30% through optimization techniques such as lazy loading and code-splitting.
- Enhanced user engagement by 25% by implementing interactive UI components and seamless navigation using React and Redux.
- Developed reusable and scalable React components, ensuring maintainability and consistency across projects.
- Worked closely with stakeholders to gather requirements, provide progress updates, and ensure alignment with client expectations.
- Actively participated in Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, driving agile project delivery.
- Worked with TypeScript in component libraries / internal tooling.

Front End Engineer

The Workfront

Feb 2022 – Feb 2023

Delhi, India

- Designed and developed complex UI components for large-scale projects, including Policy Master and Flight Portal, ensuring pixel-perfect accuracy.
- Developed backend services with Node.js for handling real-time data synchronization across multiple clients.
- Integrated APIs to display real-time data, ensuring efficient and accurate data flow across the frontend.
- Conducted user testing and incorporated feedback to improve navigation and overall application usability.
- Worked closely with the design team to translate wireframes and prototypes into functional, responsive web pages.

- Built websites from scratch, translating Figma designs into functional code.
- Ensured client satisfaction through regular project updates.
- Reduced load times by 20% by optimizing assets and implementing responsive design practices

NOTABLE PROJECTS

B2B Platform:

April 2022

- Built a scalable B2B platform to streamline business operations, ensuring near-perfect uptime with optimized React and Redux architecture.
- Designed and implemented dynamic dashboards with real-time data visualization for tracking key business metrics.
- Reduced server response time by 25% through efficient API integration and backend optimizations using Node.js and Express.js

Real-Time Financial Market Dashboard

February 2023

- Needed to support rapidly changing market data, but standard API polling caused lag and UI jitter.
- Shifted to Web-Sockets, incremental rendering, and lightweight state management for real-time streams.
- Built custom chart updates (candles, line graphs) without full re-renders.
- Result: Achieved <200ms update latency, stable charts, and production-ready financial UI performance.

Webflow + React Hybrid Rendering Engine

July 2024

- Solved the limitation of Webflow by injecting React components for dynamic data rendering & GSAP animations.
- Built a communication layer between Webflow DOM & React state.
- Developed a communication layer between Webflow DOM and React components.
- Result: 40% faster delivery with no-code + custom code hybrid architecture.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React, Redux, HTML5, CSS3, Node.js

Performance: Code splitting, lazy loading, memoization, Core Web Vitals, WebSockets, incremental rendering

Architecture: Micro-frontend, component-driven design, cross-browser compatibility

APIs & Data: RESTful APIs, real-time data streams, CRM integrations

Testing & Tooling: Jest, CI/CD pipelines, Webpack, Babel, Vite, Git

Accessibility: WCAG 2.1 AA, ARIA, semantic HTML

AI & Automation: GitHub Copilot, Cursor IDE, OpenAI API, Python · NLP · LLMs · RAG · LangChain (exploring)

Design: Figma, Webflow, HubSpot, Marketo

EDUCATION

Mangalayatan University

2022 – 2024

Master's of Computer Applications (MCA)

Maharshi Dayanant University, Haryana

2017 – 2020

Bachelor's of Computer Applications (BCA)

CERTIFICATIONS

The Complete Full-Stack Web Development Bootcamp | The Complete JavaScript Course 2025: From Zero to Expert!
